

SolarMax Energy Systems

Design of Venezuelan solar power supply system

Overview

Does Venezuela have a solar panel factory?

The engineer says: “It’s incredible, but in Venezuela, in the industrial region of Paraguaná, we have a solar panel factory, but it doesn’t have any staff. There’s materials in the storage facilities to produce for three years and supply the entire country with alternative systems.

What is a hybrid energy system in Venezuela?

In 2005, hybrid systems that mixed energy from the national electric grid with solar energy, eolic energy, and diesel fuel backup started being installed in Venezuela, with the Sembrando Luz program from the Foundation for Development of the Electric Service (Fundación para el Desarrollo del Servicio Eléctrico, FUNDAELEC).

How much electricity does Venezuela use?

The electric transmission for the entire country is limited to roughly 2,000 mw, the equivalent amount of electricity used in Caracas. But new ideas try to light up the darkness. Just like in the Venezuelan plains, electric outages with no prior warning on the Venezuelan Andes can go on for over eight hours at a time.

Where in Venezuela has no electricity?

On October 12th, for instance, areas in Miranda, Vargas, Aragua, Carabobo, Yaracuy, Lara, Zulia, Mérida and even the metropolitan area of Caracas had no electricity. The Venezuelan capital goes through at least 20 power outages per month, ranging from eight to 60 hours long.
