

SolarMax Energy Systems

Dimensions and specifications of power generation equipment container cabinets

Overview

What size generator container do I Need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions. Customized sizes to accommodate special project requirements are available on request.

What is a containerized generator set?

The durable and robust Containerized Series generator sets are ideally suited for independent power producer (IPP), mining, oil and gas, or any project where harsh conditions, challenging environments and the demand for reliable, continuous remote power exist.

What is a containerized generator enclosure?

Our containerized generator enclosures are built to be highly mobile, allowing you to easily transport and relocate your generator equipment as needed. The modular design enables quick assembly and disassembly, making it an excellent choice for temporary power needs or projects requiring frequent relocation.

Why should you choose Cummins Power Generation containerized series generator sets?

Factory pre-integrated and customizable per site requirements, the new Cummins Power Generation Containerized Series generator sets can provide significantly shortened lead time for installation, and a lower cost of ownership via a flexible design.

What is a type 6 generator container?

Our Type 6 generator containers consist of two or three pre-assembled modules, depending on the engine type and the application. The overall package (gas engine, container, and auxiliary components) is available for 65,

70, 75 and 80 dB (A) in 10m (surface sound pressure level according to DIN 45635).

What is the standard ventilation for genset containers?

The standard ventilation is designed for ambient temperatures from -25°C to +40°C. The genset containers can be equipped with several additional features to enable operation at lower temperatures on request. Type 6 containers are available with a similarly broad range of options that we offer for the Type 2 / 3 / 4 containers.
