

SolarMax Energy Systems

Distributed photovoltaic inverters in Romania

Overview

What is the future of PV in Romania?

The Romanian PV market has entered a new boom phase, driven by the current security context, the imperative of green transition, and the favorable permitting framework. As the country moves towards decarbonization and the large-scale adoption of clean technologies, the outlook for the future of PV points to sustained development.

What is the role of distributors in the solar industry?

Typically, in distribution, a company is handling the sourcing, stocking and logistics but nowadays they are also helping manufacturers in product designing and solving other business conflicts. Aside from other industries, distributors also play a vital role in the solar industry.

What drove the growth of the prosumers segment in Romania?

Another significant factor that drove the growth of the prosumers segment in Romania was the subsidy program and the fourfold increase in the funding to 610 million EUR, coupled with the possibility for prosumers with an installed capacity of up to 400 kW per consumption point to sell the excess electricity directly to their electricity supplier.

Distributed photovoltaic inverters in Romania

OVERVIEW

Last week, more than 100 solar industry representatives gathered in Bucharest to discuss the challenges and opportunities for solar in Romania, highlighting the growing interest ...
