

## SolarMax Energy Systems

# Double-glass panel inverter selection

## Overview

---

How do I choose a solar inverter?

Ensure the inverter matches the specifications of your solar panels and overall system capacity. For example, a mismatch between panel wattage and inverter capacity can lead to energy loss or system inefficiency. ESAS experts can help you ensure perfect compatibility. Look for inverters with high efficiency ratings, typically above 95%.

Can I add solar panels later with a microinverter?

While it's easier to add solar panels to your system later with microinverters, choosing the right string inverter before your installation is critical, as central inverter systems are typically built-to-suit without the capacity for expanded solar generation. Use our online tool to find the right sizes for your solar energy system components.

What are the different types of solar inverters?

For instance, a microinverter system can increase energy output by up to 25% in partially shaded areas. String inverters connect a series (or "string") of panels to a single inverter. These are the most common type used in residential and commercial solar systems.

Does a solar inverter have a monitoring system?

Most solar inverters come with a solar monitoring system that allows you to track the performance of your solar panels online or with a smartphone app. This can include real-time data on power output, overall energy production, and system health.

What is a solar inverter?

Solar inverters are the heart of any solar energy system, converting the direct current (DC) electricity generated by solar panels into alternating current (AC) power for homes, businesses, or utility grids.

Who is the Trusted Partner for solar inverters?

Here's why we're the trusted partner for solar inverters: **Top Brands:** Access inverters from industry leaders like Solis, Victron, AP Systems, Enphase, and SolarEdge. **Expert Guidance:** Our team provides personalized consultations to help you select the ideal inverter for your system.
