Double glass sun room structure

Overview

What type of glass is used to build a sunroom?

This will give you a better idea of what type of glass is being used to build your room. A truly insulated sunroom is built using double-pane glass - never single pane glass. Between the layers of glass is usually an inert gas such as Argon, which provides a barrier to insulate the room from outside temperatures.

Is single-pane glass a good choice for a sunroom?

Although single-pane glass is the most affordable option, it offers minimal insulation. That means sunrooms will be hot in summer and cold in winter. Take your business to the next level with Cedreo! Design better sunroom additions with expert tips, cost breakdowns & design considerations. Impress clients, land more jobs & design sunrooms faster!.

How do I choose the best glass for my sunroom?

Where you choose to build your sunroom will also help determine which type of glass makes the most sense for your unique project. While sunroom location and type are very important, the safety of the glass is also a necessary consideration. Make sure that you ask for tempered glass.

Should you build a sunroom with floor-to-ceiling glass?

To maximize a great outdoor view from your home, a sunroom with floor-to-ceiling glass, also called a solarium, could be the right choice for you. This special sunroom has wall-to-wall glass as well as a glass roof. Where you choose to build your sunroom will also help determine which type of glass makes the most sense for your unique project.

Do sunrooms have tempered glass?

Few companies offer tempered glass as a standard feature for their sunrooms. Some may charge extra for this special glass. In reality, nobody should even

consider a sunroom built with un-tempered glass. If you plan on using your sunroom year-round, make sure that you ask to see an insulated glass sample.

How do I choose the best sunroom windows?

A sunroom isn't a sunroom without walls of windows and bright natural light. When choosing the best sunroom windows for your space, consider these four things. Choosing the right type of sunroom window—casement, double-hung, sliding, or picture—depends on your ventilation needs, available space, and accessibility.
