Downgraded PV module exports

Overview

Will India's PV module exports decline in 2023?

The PV module exports from India to the U.S. have increased exponentially in the fiscal year (FY) 2023 (16x from FY2022 by value). In the backdrop of huge manufacturing capacities being set up in the U.S. under IRA, Indian PV module exports to the U.S. may experience a period of stagnation from 2025 and later decline from 2027 onwards.

Will Indian photovoltaic module exports suffer a period of stagnation?

In the backdrop of huge capacities likely to be set up in the U.S. under the Inflation Reduction Act (IRA), Indian photovoltaic (PV) module exports to the U.S. may experience a period of stagnation from 2025 and decline from 2027.

Why did PV module exports increase 16 times in 2023?

JMK Research added that the PV module exports from India to the US had grown exponentially, up 16 times in 2023 compared to 2022, due to ongoing investigations into module imports from Southeast Asian countries in the US.

Which countries import PV modules?

The total for all types of PV modules is provided. Table 7. Information in Table 7 covering imports has been consolidated into four categories: China, Singapore, Taiwan & Vietnam; Malaysia; South Korea, Thailand, and United Arab Emirates; and All Others and Unknown. All Others and Unknown includes data from annual and monthly respondents.

Can data be published for different types of PV cells & modules?

Data can no longer be published for the specific types of PV cells and modules, or by region. Table changes: Table 1. Not published for 2022. Table 2. Unchanged, includes data from annual and monthly respondents. Table 3. Unchanged, includes data from annual and monthly respondents. Table 4.

Which Indian solar module manufacturers are planning to expand their production capacity?

Additionally, several Indian solar module manufacturers announced plans to expand their manufacturing capacities. For example, solar module manufacturer Gautam Solar planned to double its annual module production capacity to 2GW by the end of next year through an investment of INR1.5 billion (around US\$17 million).
