East Asia Solar Panel with Pump

Overview

What is the largest floating solar power plant in Southeast Asia?

Disclaimer: The views and opinions expressed in this article are those of the author and do not necessarily reflect the official policy or position of Energy Tracker Asia. In November 2023, Indonesia inaugurated the Cirata Floating Solar Power Plant, which has a capacity of 192 MW and is the largest floating solar power plant in Southeast Asia.

How much solar power does Southeast Asia have?

Presently, ASEAN boasts 28 GW of large utility-scale solar and wind power, contributing 9 percent to the region's total electricity capacity. Solar photovoltaics (PV) play a pivotal role renewable energy revolution of Southeast Asia. Abundant sunlight, economic growth, and the rising demand for clean energy drive this shift.

Does East Asia have pumped hydro energy?

East Asia has abundant wind, solar, and off-river pumped hydro energy resources. The identified pumped hydro energy storage potential is 100 times more than required to support 100% renewable energy in East Asia.

Why does ASEAN need a floating solar power plant?

The ASEAN economy will still grow by 6%; therefore, it needs a large quantity of energy. Floating solar power plant technology makes achieving a huge capacity power generation possible," said Capellan at the ASEAN Clean Energy Week Conference and Exhibition in Manila, the Philippines, on November 21-22, 2023.

Why is Southeast Asia a top exporter of solar power equipment?

In little over a decade, Southeast Asia has become one of the world's top exporters of solar power equipment – a success driven significantly by the relocation of Chinese manufacturers to the region. But now, the sector faces

considerable challenges as US tariffs cut off their main export market, intensifying pressure on a previously booming trade.

Does Asia need solar power?

Asia's growing energy demand has often been framed through the lens of its coal, gas or nuclear dependence, but solar power is growing rapidly across the region. Over the last decade China, India, South Korea, Viet Nam and Japan have significantly increased the share of solar power in their respective energy mixes.
