East Asia factory photovoltaic solar panels

Overview

What is the biggest solar PV project in Southeast Asia?

Philippines The biggest operational solar PV project to date in Southeast Asia is the 132.5 MW Cadiz Solar Power Plant located in the province of Negros Occidental in the Philippines. The plant is owned by Helios Solar Energy Corporation and is being operated and maintained by Bouygues Construction.

Are solar tariffs affecting Southeast Asia's solar industry?

Some Southeast Asian manufacturers are now facing duties of more than 250% on imported solar products. The burden of these tariffs on foreign manufacturers could change the supply chains for solar panels coming to American consumers, and the shape of that industry in the U.S.

What is the Southeast Asia Solar supply chain map?

This edition of the Southeast Asia Solar Supply Chain Map provides a detailed snapshot of current realities and future ambitions, as the region navigates complex trade, investment, and production challenges.

Why is Southeast Asia a top exporter of solar power equipment?

In little over a decade, Southeast Asia has become one of the world's top exporters of solar power equipment – a success driven significantly by the relocation of Chinese manufacturers to the region. But now, the sector faces considerable challenges as US tariffs cut off their main export market, intensifying pressure on a previously booming trade.
