

Overview

What is Egypt's first commercial wind project?

Egypt's first commercial wind project was the phase one of the Zafarana wind farm in the Gulf of Suez area, which was commissioned in 2001 with a capacity of 30 MW. This was followed by seven more phases, which increased the farm to about 700 turbines and 545 MW by 2010. Strategy for Achieving the 12% Target.

Where are the best wind farms in Egypt?

In Egypt, there are excellent wind regimes in the Gulf of Suez region, on the Nile banks in the Western and Eastern Desert and in some parts of the Sinai, he noted. Egypt is in a favorable position when it comes to the cost of wind energy since most of its potential is for onshore farms.

Is Egypt a good place to invest in wind energy?

Egypt is in a favorable position when it comes to the cost of wind energy since most of its potential is for onshore farms. These require significantly less investments than offshore farms, which constitute the vast majority in Europe.
