El Salvador Communication Base Station Power Supply Construction Project

Overview

Why is El Salvador preparing a mega plan for road infrastructure constructions?

Photo: Fabio Lima. A mega plan for road infrastructure constructions is already underway at El Salvador. The absolute priority of the country is to improve land connectivity to reduce mobility times for people and goods, streamlining the daily life of companies. All the details of this plan, in this interview with Minister Romeo Rodríguez.

What are the major projects in El Salvador?

About 40% of the goods of our country are transported using this highway and its improvement will have a significant impact on local economy. Another important project is the construction of a bridge in La Hachadura, the longest bridge that has been built in the country, with 246 meters in length, which will connect El Salvador with Guatemala.

What works are being done in El Salvador?

There are some works being executed at the moment, others about to be opened for tender, to hire companies. One of them is the public tender for the construction of the Los Chorros highway, the largest road infrastructure work that has been done in the history of El Salvador, with total investment of 245 million dollars.

Who can participate in public investment projects in El Salvador?

Every company, national or international, can participate under equal conditions in the public investment projects of the Government of El Salvador, both from the Ministry of Public Works, as well as from other State bodies. When we launch a project, we invite all companies to download the tender rules from our platform compraal.gob.sv.
