

SolarMax Energy Systems

Energy Storage Battery Mode

Overview

What are the different energy storage operating modes?

There are four different energy storage operating modes available: (1) Self Use (2) Feed In Priority (3) Backup (4) Off Grid You can turn these modes on and off by following this path: Advanced Settings > Storage Energy Set > Storage Mode Select.

How do I set up energy storage?

There are four different energy storage operating modes available: (1) Self Use (2) Feed In Priority (3) Backup (4) Off Grid You can turn these modes on and off by following this path: Advanced Settings > Storage Energy Set > Storage Mode Select > use the Up and Down buttons to cycle between the four modes and press Enter to select one.

What is a battery energy storage system (BESS)?

Battery Energy Storage Systems (BESS) are pivotal technologies for sustainable and efficient energy solutions.

How many battery modes does SolarEdge have?

SolarEdge PV systems can operate in four battery modes. Each mode prioritizes different aspects — solar power use, cost efficiency, personalization, and backup energy supply. You must be a Site Owner to set the battery mode. Your installer can make you a Site Owner in the Monitoring platform.

What happens to the battery after power is restored to the grid?

After power is restored to the grid, the battery is recharged to 100%. The Backup Only mode is available only for Backup sites. You can change the mode back to the installer's settings in the mySolarEdge app. This gives the installer permission to change the battery mode in the Monitoring platform.

How do I set the battery mode on mysolaredge?

You can set the mode to maximize the use of solar power for self-consumption and battery charging. Open mySolarEdge app and tap the Battery icon on the bottom pane. Go to Battery Mode > Battery Mode Panel and tap Maximize Self Consumption.
