

SolarMax Energy Systems

Energy storage and charging products

Overview

What is a battery energy storage system?

Battery energy storage systems store surplus energy during periods of high energy production and then release it during peak demand to meet residential, C&I, and utility-scale needs, while also provide auxiliary services for grid peak and frequency regulation.

What is a battery energy storage system (BESS)?

Battery Energy Storage Systems (BESS) are pivotal technologies for sustainable and efficient energy solutions.

Why should your business use a battery energy storage system?

Provide your customers with the green amenities they need and future-proof your business all while generating savings on your utility bill. Utilize our battery energy storage system for high power output applications, improved resilience, and energy arbitrage. Supercharge your electric fleet with our industrial charging applications.

Why should you choose Eaton energy storage systems?

Take control of your energy supply, cut your energy bills and simplify your shift toward a more sustainable future. Eaton energy storage systems enable communities and businesses to access a safe, reliable and efficient solution to support the electrification of transportation.

What is a liquid cooled battery energy storage system?

The system consists of: Ready to install liquid-cooled battery energy storage system with one (2-hour version) or two (4-hour version) battery cabinets, and a PCS cabinet. Liquid cooling provides two years longer battery service life and 15% higher discharge capacity, while maintaining less than 2.5 degree C delta between cells.

What is Johnson Controls battery storage & energy solutions?

6. Johnson Controls Battery storage and energy solutions systems from Johnson Controls allow for seamless integration with existing building technology systems. These utilise algorithms that provide for flexible and custom applications, the company says, such as demand management, frequency regulation and integration with renewables.

Energy storage and charging products

Custom energy storage boosts on-site self-consumption

1 day ago · After several months of development, Faradae has delivered a smart, controllable battery system designed to increase the self-consumption of energy generated by a rooftop ...
