

SolarMax Energy Systems

Energy storage container earthquake resistance

Overview

Earthquake-resistant containers are engineered to withstand seismic forces, reducing the risk of collapse during an earthquake. These containers often feature reinforced frames, flexible joints, and shock-absorbing materials.

Energy storage container earthquake resistance

Lithium battery parameters

Product capacity: 100Ah

Product size: 135*197*35mm

Product weight: 1.82kg

Product voltage: 3.2V

internal resistance: within 0.5

Seismic resistance for high-rise buildings using water tanks

Besides using TLD to analyze the seismic resistance for high-rise buildings, this paper is also considered the interaction between the liquid and tank wall for with/without using water tank at ...
