

## SolarMax Energy Systems

# Energy storage export prospects

## Overview

---

What drives energy storage project development?

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.

Is the energy storage industry facing growing pains?

Helen Kou, an energy storage associate at BNEF and lead author of the report, said: “The energy storage industry is facing growing pains. Yet, despite higher battery system prices, demand is clear. There will be over 1 terawatt-hour of energy capacity by 2030.

Will supply chain constraints Slow BNEF's energy storage deployments?

BNEF has more than double energy storage deployments from 2025 to 2030 across Europe from previous forecasts. Although the scale-up of global energy storage capacity is imminent, supply chain constraints could slow additions.
