Energy storage power station changes investment entity

Overview

Who can install energy-generation & storage property?

Tax-exempt and governmental entities, such as state and local governments, Tribes, religious organizations, and non-profits may install energy-generation and storage property to meet energy demands, reach clean energy transition goals, or save money on energy costs.

Who can claim energy storage credits?

Taxpayers with a qualified facility and energy storage technology placed in service after Dec. 31, 2024 may claim the credit. Elective payment and transfer of credits may be available to certain applicable entities to include tax-exempt organizations and government entities.

What are the tax benefits of investing in energy projects?

Investments in energy projects offer two primary tax benefits: the ITC and accelerated depreciation. Some developers cannot use these tax benefits themselves but can use them to incentivize tax equity investors that provide bridge financing until the projects receive cash payments.

What is the base tax credit for energy projects?

- For projects beginning construction on or after Jan. 29, 2023 or where the maximum net output is 1 MW or greater, the base tax credit is 6% of the taxpayer's basis in the energy property or qualified facility (or energy storage technology).

Are storage projects eligible for ITC & PTC?

Storage projects that start construction before 2033 will remain eligible for both the ITC and PTC. Those beginning in 2025 can receive an ITC of up to 50% under 48E if domestic content and labor standards are met, though the ITC will phase out entirely by 2035.

What is the threshold percentage for energy storage technology?

For energy storage technology that begins construction in 2026, the threshold percentage is 55%. The percentage increases by 5% per year until it reaches 75% for energy storage that begins construction after 2029.
