

## SolarMax Energy Systems

# Energy storage project boom period

## Overview

---

Are LFP batteries causing a boom in energy storage projects?

LFP batteries are fuelling a boom in energy storage projects that - in percentage terms - now outpaces electric vehicle sales growth. UBS bank estimates total storage capacity must grow eight-fold by the end of this decade and 34-fold by 2050 to keep up with the renewable power expansion.

Will energy storage continue through 2025?

And you can expect both trends to continue through 2025. ACP and Wood Mackenzie's latest Energy Storage Monitor highlights rapid growth in Texas and California, where grid operators ERCOT and CAISO have been particularly eager to embrace storage as a solution to constraints and resiliency concerns.

How does energy storage impact economic growth?

Submit a case study with the chance to be featured in Renewable Energy World. ACP adds that increased energy storage deployment not only enhances reliability and affordability but also drives U.S. economic expansion, supporting growing industries like manufacturing and data centers.

Are battery storage projects a symbiotic relationship?

Close to half of all battery storage projects are paired with solar or wind energy projects as part of their symbiotic relationship. "Without batteries it would be mayhem," said Izzet Bensusan, founder and CEO of the Captona energy transition investment firm. "The utilities are realizing that without batteries they cannot manage the grid."

Are thermal energy storage project developers transforming the TES industry?

The emergence of thermal energy storage project developers affirms our expectations for growth in the TES industry. The main driver for manufacturers is cost savings.

Why is energy storage important?

ACP adds that increased energy storage deployment not only enhances reliability and affordability but also drives U.S. economic expansion, supporting growing industries like manufacturing and data centers. “Energy storage is crucial for energy security and to help outpace rising demand,” chimed Noah Roberts, ACP’s VP of energy storage.
