

## SolarMax Energy Systems

# Energy storage systems above 5kWh

## Overview

---

How can a 1 MWh energy storage system be expanded?

With a 1 MWh energy storage system as a unit, it has wide applicability and can expand capacity by combining multiple units in parallel, which has a good competitive advantage and can also be connected to new energy sources or connected to the grid as a distributed power source of smart grid.

What is the 100 MW energy storage system?

The 100 MW system is an energy storage installation that will provide critical capacity to meet local reliability needs in the area, while helping California meet its environmental goals.

Why is X1 a good energy storage system?

X1 is equipped to endure the extreme chill and heat with its superior build for peak performance. X1 solves battery power challenges during freezing weather. Thermal boosting kicks in at 32°F and keeps the battery operating at 68°F. Most energy storage systems suffer from power output drops when the temperature rises. Not X1.
