

## SolarMax Energy Systems

# Factory inspection of energy storage containers

## Overview

---

Do battery energy storage systems look like containers?

C. Container transportation Even though Battery Energy Storage Systems look like containers, they might not be shipped as is, as the logistics company procedures are constraining and heavily standardized. BESS from selection to commissioning: best practices<sup>38</sup> Firstly, ensure that your Battery Energy Storage System dimensions are standard.

When should a battery energy storage system be inspected?

Sinovoltaics advice: we suggest having the logistics company come inspect your Battery Energy Storage System at the end of manufacturing, in order for them to get accustomed to the BESS design and anticipate potential roadblocks that could delay the shipping procedure of the Energy Storage System.

What should be included in a contract for an energy storage system?

Several points to include when building the contract of an Energy Storage System:

- Description of components with critical technical parameters: power output of the PCS, capacity of the battery etc.
- Quality standards: list the standards followed by the PCS, by the Battery pack, the battery cell directly in the contract.

How are battery energy storage systems transported?

Given the Battery Energy Storage System's dimensions, BESS are usually transported by sea to their destination country (if trucking is not an option), and then by truck to their destination site. A. Logistics The consequence is that the shipment process can be worrisome.

When does an energy storage project start?

"The operations and maintenance phase of an energy storage project begins when the system has been successfully commissioned and the owner has

obtained approval to operate the system.

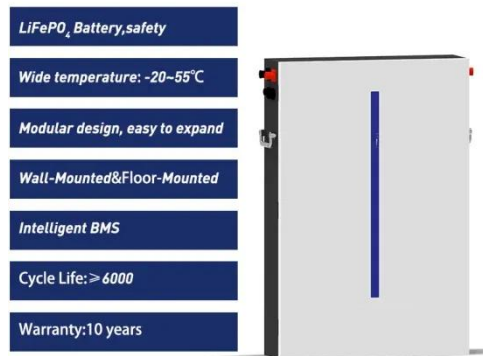

Does container manufacturing take a lot of space?

Container manufacturing can take (a lot of) space. If your project requires a 40ft container, your container manufacturing will probably take place outdoors. During that step, several points need to be looked at: •

Manufacturing environment: no clean room required here, but is there any risk of electrocution following a heavy rain?

## Factory inspection of energy storage containers

---

### On-site quality inspections for energy storage components

Sinovoltaics performs independent quality inspections on-site at the Battery Energy Storage factories in Asia, assuring the workmanship quality, constructional design conformity, ...
