

## SolarMax Energy Systems

# Fast-installed prefabricated foundation for the energy storage system of a communication base station

## Overview

---

What is a prefabricated substation?

Prefabricated substations with up to 420 kV : Siemens Energy provides a large range of prefabricated substations that are equally suited for either temporary or permanent use in challenging grid expansion- and maintenance programs or as emergency response.

Do you have the Right Foundation for your energy storage project?

When it comes to energy storage projects, having the right foundation involves careful planning upfront. But each site is different, requiring careful consideration for details like the types of equipment being supported, site location and geologic factors.

What are Siemens Energy prefabricated power solutions?

Siemens Energy prefabricated power solutions enable faster and more reliable grid connection for power-critical infrastructures such as electrical generation or process industries, and they ensure little exposure to site work contingencies. Remote or hostile environments usually lead to high labor costs.

What are the benefits of prefabricated substations?

This way, the prefabricated substations can bring time savings of up to 30% in substation construction. They also reduce the risk exposure significantly thanks to: Reduced duration of site works and less need of skilled labor. Siemens Energy portable power solutions can increase the resiliency of a power grid and help ensure uninterrupted service.

Why is Hitachi energy developing a pre-fabricated Indoor Substation?

Customers requiring shorter overall delivery times and minimal on-site work have been the main drivers for Hitachi Energy's development of pre-fabricated indoor substations.

What is a 420 kV grid substation?

Fast deployable, independent grid substations up to 420 kV for Transmission System Operators are increasing the availability of energy transmission systems. The substation is designed for road transportation and dimensions of each unit meet local road transportation requirements.
