

SolarMax Energy Systems

Finland iron energy storage lithium battery manufacturer

Overview

What is a battery from Finland project?

Batteries from Finland -project is enhancing the growth of knowledge basis and global competitiveness along the entire battery value chain – from raw material production to battery cell production, battery applications and recycling. The study was commissioned by Business Finland and jointly executed by Gaia Consulting and Spinverse. WHY FINLAND?

.

Is Finland a good operational environment for Li-ion batteries?

The attractiveness of Finland as operational environment for COMPANIES currently active within the Li-ion battery value chain in Finland was mainly considered as somewhat attractive or attractive covering together 81% of the company representative answers.

Is a battery storage project a good investment in Finland?

It is a very good complement to our renewable project developments in Finland,” says Prot. Antero Reilander comments that while there have been other battery storage projects in Finland, this one is the biggest – by far. Despite the size of the undertaking, the project has proceeded very smoothly indeed.

Why should you invest in the battery industry in northern Europe?

Northern Europe is an excellent location for the battery industry, as the availability of raw materials and clean energy is good, production chains are transparent, and sources of battery materials can be traced. Sweco’s international team is dedicated to support investors in a developing of a sustainable battery industry across Europe.

Which companies are integrating Li-ion batteries into their solutions?

A wide range of Finnish, Nordic and European technology companies are integrating Li-ion batteries into their overall solutions. Especially in case of large global companies, Li-ion battery technologies and products may become part of their core offering by acquisitions or by organic growth and recruitments. Main actors are shown on the next slide.

What are lithium-ion batteries used for?

Lithium-ion batteries are needed, for example, in the electrification of transport, consumer electronics, tools and backup power supplies. Electric batteries also offer solutions for energy storage and enable flexible utilisation of renewable energy. Our experts lead the planning and implementation of projects in the battery industry.
