

SolarMax Energy Systems

First time to put new energy storage charging pile into use

Overview

What is an EV charging pile?

An EV charger or charging pile is a unit intended for supplying electric energy to an electric vehicle that requires charging in order to increase its stored energy. They act as intermediaries between the power grid and an electric vehicle (EV), controlling the current and voltage supply to ensure that charging is done efficiently and safely.

What are the charging pile instructions?

Instructions for Charging Pile-V1.3.0: Power Output Mode: Can be switched between intelligent mode and priority mode. In intelligent mode, the charging pile power is equally distributed between the two vehicle connectors.

What is the difference between charging pile and charging station?

Although “charging pile” and “charging station” are occasionally used interchangeably, they describe different ideas. A charging pile is the basic component of an electric power infrastructure that allows electricity to flow to the vehicle.

Why is it important to maintain the charging pile?

The importance of maintaining charging piles lies in the fact that influences by the changeable environment and ageing inner parts can cause various faults. Regular examination and maintenance are necessary during both product storage and using processes.

Why do EV owners need a private charging pile?

The effectiveness of PV energy sources is also substantially grown because an abundant charging network encourages the application of clean energy in place for fossil fuels, contributing to lower carbon emissions around the world. The installation of a private charging pile is economically beneficial to EV owners.

How to start and stop the charging pile?

To start the charging pile, click the screen to select the charging mode, choose the charging connector, and begin charging. To stop the charging pile, enter the 'setting interface' -- function setting -- startup mode, and select 'start by button'.

First time to put new energy storage charging pile into use

New Energy Storage Charging Pile Product Introduction

Guangdong Aipower New Energy Technology Co., Ltd. Is a high-tech company focused on the power quality and renewable energy industry of power electronic technology, from Germany ...

[Get a quote](#)

How to make charging piles with solar power , NenPower

To create charging piles powered by solar energy, several critical steps must be undertaken: 1. Assessing energy needs, 2. Selecting ...

[Get a quote](#)

How to use charging piles to charge new energy vehicles

Take the shared charging pile as an example; generally, the charging pile will have a QR code logo. Sweep it to enter the public number or APP page, and then you can use it after ...
