French photovoltaic module prices

Overview

How much does a photovoltaic module cost?

Mainstream Modules: Average price of €0.11/Wp, stable compared to September but 21.4% lower than January 2024. Low-Cost Modules: Average price of €0.065/Wp, a 7.1% decrease from September and 27.8% from January 2024. These trends are exerting mounting pressure on the photovoltaic sector.

Should you invest in photovoltaic solar panels in France?

Invest in photovoltaic solar panels in France is an important decision for many individuals. With this technology, you can produce green electricity, save money on your energy bills and even generate additional income. Find out everything you need to know about solar panels in France to make the best possible choice.

How much does a photovoltaic panel cost?

Mainstream Photovoltaic Panels: Average price of €0.10/Wp, down 9.1% month-on-month. Low-Cost Photovoltaic Modules: Average price of €0.060/Wp, a decrease of 7.7% compared to the previous month. These figures underscore the significant pressures in the photovoltaic market, as price reductions strain margins to unprecedented levels.

Do French people have a good opinion on photovoltaics?

The RTE Ipsos study on the decision-making mechanisms of the French population in terms of energy consumption, carried out in 2023, shows that the same proportion of the sample surveyed in 2022 have a good opinion of photovoltaics (66%). However, 16% have a bad opinion (compared with 18% in 2022).

What are France's photovoltaic policies?

The framework for developing photovoltaics policies in France falls within the

long term National Low Carbon Strategy (SNBC, 2050 horizon) and the 10-year Energy Programme Decree (PPE). The Pluriannual Energy Programme (PPE) still sets the target for French photovoltaic capacity at 20.1 GW in 2023 and at least 35.1 GW in 2028.

What is the target for French photovoltaic capacity in 2023 & 2028?

The Pluriannual Energy Programme (PPE) still sets the target for French photovoltaic capacity at 20.1 GW in 2023 and at least 35.1 GW in 2028. In order to achieve these targets, a schedule of calls for tenders has been adopted, with around ten calls for tenders launched each year.
