

SolarMax Energy Systems

Gabon container power generation low emissions

Overview

Can Gabon become a regional energy hub?

As Gabon transitions from oil dependency to cleaner energy, gas-fired power generation will bridge the gap and support the country's shift. Key infrastructure developments, such as the Owendo plant and floating power solutions, position Gabon for long-term energy security and enhance its potential as a regional energy hub.

Why is Gabon accelerating its focus on gas-to-power?

Gabon's accelerated focus on gas-to-power presents significant investment opportunities, driven by its growing energy market and strategic push to diversify its energy mix.

Is biomass a source of electricity in Gabon?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Gabon: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

How will Gabon expand its power generation capacity?

The demand for advanced technology, skilled labor and power generation services will continue to rise as Gabon expands its electricity generation capacity, presenting significant opportunities for companies in gas extraction, power generation and transmission.

What type of electricity does Gabon use?

Renewable electricity here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal power. Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can

be an important source in lower-income settings. Gabon: How much of the country's electricity comes from nuclear power?

.

Is Gabon a gas-to-power leader?

The Owendo power plant, VAALCO's production expansion and the commissioning of Karpower's floating plants are positioning Gabon as an emerging gas-to-power leader, creating extensive opportunities for investors and service companies to explore at the upcoming Invest in African Energy Forum in Paris.
