Georgia coal-to-electricity solar power generation for home use

Overview

How does GA Solar help Georgia's energy consumers?

GA Solar helps advocate for solar power in Georgia on behalf of energy consumers. By informing local and state leaders about policies that make solar benefits accessible, GA Solar supports investment and local economic growth, keeping Georgia's economy strong.

How many MW of solar power will Georgia Power Buy?

Sept 5 (Reuters) - Utility Southern Co's (SO.N) unit Georgia Power said on Friday it had received approval from the Georgia Public Service Commission for five new solar site power purchase agreements totaling 1,068 megawatts (MW).

What is Georgia Power's community solar program?

Georgia Power's Community Solar program gives you the opportunity to support the development of solar power in Georgia by subscribing to a portion of local solar facilities. You then receive energy credits on your monthly bill based on the solar facility's production.

What are the benefits of solar power in Georgia?

One major benefit of using solar power in Georgia is the Solar Power Free-Market Financing Act of 2015, which allows solar leasing and power-purchase agreements, making solar more cost effective for home and business owners statewide.

Do all solar facilities belong to Georgia Power?

Not all solar facilities you may come across belong to Georgia Power. We have constructed and are operating 16 solar farms and additional demo facilities across the state of Georgia, many in partnership with military installations. The largest, at 128 MW of capacity, is located at Robins Air Force Base in Warner Robins, Georgia.

Does Georgia have solar?

Want Solar?

Sunlight is one of Georgia's most abundant resources with an average of 218 sunny days per year. More than 3,000 MW of solar resources, or approximately 12% of our total capacity*, generate significant carbon-free energy for Georgians during sunny, daylight hours.
