# **Ghana Energy Storage Power Station Procurement**

## Overview

---

Why do we need a power purchase agreement in Ghana?

The power sector's acute problems call for a new, more transparent approach in order to reduce costs, pay down debt, improve electricity supply, and rebuild public confidence. Ghana currently has 32 identifiable contracts, or Power Purchase Agreements (PPAs), in force for the provision of electricity generation.

How many PPAs are in force for electricity generation in Ghana?

This case study, written in collaboration with the Institute of Economic Affairs (IEA Ghana), identified 32 PPAs currently in force for the provision of electricity generation. We have summarized the implications of these contracts, and compiled all available public information into a downloadable Annex.

Why does Ghana need a more transparent electricity contracting system?

Ghana's electricity sector faces an urgent crisis of immense financial strain that calls for a new, more transparent approach for contracting power in the future. Public information on current contracts is highly limited, which has contributed to overcapacity, weakened sector planning, mounting debt, and rising concerns over public accountability.

Does Ghana pay for electricity if no electricity is consumed?

In addition, most of these contracts were agreed on a take-or-pay basis, which means that the government of Ghana must pay for the generation capacity even if no electricity is consumed. The only publicly-disclosed aspects of these PPAs are the names of the project, contract type, technology/fuel, location, and total project cost.

Does Ghana have a PPA?

Both Volta River Authority (VRA) and the Electricity Company of Ghana (ECG) have PPAs in place with private Independent Power Projects (IPPs). The

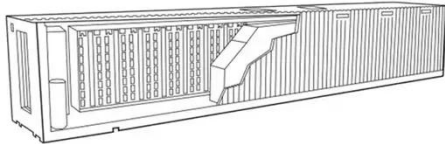

Ministry of Energy has also contracted PPAs with Emergency Power Producers (EPPs).

How many renewable generation licenses are there in Ghana?

Issuance of renewable generation licenses has halted since October 2018, and only 3 of the existing 124 licenses have been developed. Ghana does not have a comprehensive legal document regarding PPAs. However, the Constitution, along with several other regulations provides some legal framework for PPAs.
