How many mw subsidized battery storage in Greece?

Home » News » Renewables » Greece awards 188.9 MW for subsidized battery storage in final auction Greece's third energy storage auction has been completed, with nine projects selected and a capacity of 188.9 MW.

What is Greece's third energy storage auction?

Greece's third energy storage auction has been completed with nine projects selected. It was the final auction where the state provides subsidies to build battery energy storage systems (BESS). A total of almost 800 MW in capability has been awarded through all three storage auctions.

What is the quota for battery energy storage in Greece?

The quota for the latter is 50 MW. The program is part of the just transition efforts within Greece's coal phaseout, currently scheduled to be completed in 2026. Grants for the capital expenditure or capex for the battery energy storage systems (BESS) are set at EUR 200,000 per MW.

Why is Greece launching a battery storage auction?

Initially a response to the COVID 19 pandemic, the focus has pivoted to support Greece's green energy transition. The storage auctions themselves require further approval under EU State aid rules. The pipeline of prospective battery storage projects now approaches 27GW, with over 500 projects granted a storage license.

Does Greece have a battery storage pipeline?

Greece has emerged as one of the countries with the largest pipeline of battery storage projects, but as yet there has been little activity on the ground. This is changing as the long-awaited storage subsidy auctions have started, with the first projects being awarded support for both investment and operating costs.

What is Greece's battery storage goal?

As part of Greece's revised National Energy and Climate Plan (NECP), the battery storage goal is set at 4.3 GW for 2030. The final plan will be submitted to the European Commission toward the end of October. The public consultation process was recently completed. There is a strong appetite from investors for storage.
