

SolarMax Energy Systems

Grid-side energy storage power station supporting rooms

Overview

Energy storage is one of the key technologies supporting the operation of future power energy systems. The practical engineering applications of large-scale energy storage power stations are increasing, an.

Grid-side energy storage power station supporting rooms

First new-type energy storage power station put into operation in

The construction of grid-side new-type energy storage projects is a key task for ensuring power supply during peak summer demand in Jiangsu Province in 2024.
