High frequency inverter square wave

Overview

At present, to generate HFAC output, existing inverters mainly use a DC/AC inverter to produce high-frequency square wave or high-frequency quasi-square wave output, which is later changed into a high-frequency sine wave by a resonant converter.

High frequency inverter square wave

6.4. Inverters: principle of operation and parameters

Combination of pulses of different length and voltage results in a multi-stepped modified square wave, which closely matches the sine wave shape. The low frequency inverters typically ...
