

SolarMax Energy Systems

Home Solar System Design

Overview

This article provides information about steps for planning to power home with solar energy including investigating home's efficiency, assessing options for going solar and understanding available financing and incentives etc.

Follow the steps to power your home with solar energy, including investigating your home's energy efficiency, assessing your options for going.

Before starting process of powering home with solar energy, investigate energy use and consider potential upgrades such as a home energy audit or efficient appliances/electronics/lighting.

Renting or owning is no longer only option if you want to go solar; many programs enable homeowners to benefit from it even without purchasing rooftop systems like leasing or PPA.

Determine amount of power generated by a solar system at site depends on sun's reach & size of system using mapping services or tools;.
