

SolarMax Energy Systems

Home gravity energy storage device

Overview

A gravity battery is a type of device that stores —the E given to an object with a mass m when it is raised against the force of $(g, 9.8 \text{ m/s}^2)$ into a height difference h . In a common application, when sources such as and provide more energy than is immediately required, the excess energy is used to move a mass upward agains.

Gravity (chemical) battery

A gravity battery is a type of energy storage device that stores gravitational energy--the potential energy E given to an object with a mass m when it is raised against the force of gravity of Earth (g , 9.8 m/s^2) into a height difference h . In a common application, when renewable energy sources such as wind and solar provide more energy than is immediately required, the excess energy is used to move a mass upward against...
