

## SolarMax Energy Systems

# Home plus solar power generation

## Overview

---

Are solar generators a good option for your home?

Solar generators are quiet, lack any harmful fumes and exhaust, and are completely renewable. With a handful of well-placed solar panels, you can provide a FREE supply of backup power for your home. Today, solar home backup power is within reach of everyone.

Can a solar generator power a whole house?

Probably not, unless you get a large solar generator and you have a tiny home. Solar generators are meant to power and charge just a few electronics, not the entire house. If you want to backup your entire house, go with a wired system complete with solar panels on the roof and a high-capacity battery bank.

What is the best 2000W home backup solar generator?

It's hard to choose the best 2000W home backup solar generator because there are so many of them in this range. But I think the Jackery Explorer 2000 Pro offers the best combination of value, power, capacity, versatility and charging performance. Can power most home appliances. Large capacity. Wide range of output options.

Can a solar generator be used as a whole-house backup?

Most solar generators have smaller lithium batteries that are good for a few hours to a couple of days. It's hard to find a solar generator you can use for whole-house backup. You have to choose which electronics you want to run in an emergency. You are also limited in terms of output.

Which solar generator should I buy?

If you want a solar generator that can keep most of your appliance running during a power outage, the Lycan 5000 Power Box is a great pick. With an output of 3500W, it can not only power almost any household appliance, it can

power several at the same time. In an emergency, you can keep using your fridge, TV, washing machine, and other appliances.

Which solar generator is best for living off the grid?

You'll be hard-pressed to find a solar generator better suited for living off the grid for an extended period than the Bluetti AC200 Max. It boasts a substantial 2,048Wh capacity, allowing you to power your whole life off it longer than most portable generators.
