

SolarMax Energy Systems

Household Energy Storage System Installation

Overview

Battery storage allows you to store electricity generated by solar panels during the day for use later, like at night when the sun has stopped shining. While batteries were first produced in the 1800s, the types of battery storage systems that can store solar power and provide electricity to households are fairly new.

The significant reduction in the cost of battery storage systems in recent years means that installing a battery is fast becoming a viable option for many Australian.

Battery storage uses a chemical process to store electrical energy, which can then be used at a later time. For example, a solar-powered torch stores.

When purchasing a battery storage system it is important to discuss your needs with a system designer. They will help you choose the best way to set up your.

(Manufacturer BESS*) OFF-THE-SHELF SYSTEM These systems are typically all-in-one systems that require little customisation to be installed.
