# How long does it take for an energy storage container to pay back

## Overview

---

How long does it take for solar panels to pay back?

So, if it takes 10 years to recover the cost of your solar panels, you can still expect savings on your electric bills for another 15 years, which is an excellent investment. Solar companies can provide you with an estimate of your payback period.

How long does it take to recoup solar energy?

Switching to solar energy is a major financial commitment and, if you're like most homeowners, you'll want to know how long it will take to recoup your investment. This average recovery time, called the solar panel payback period, typically ranges from six to 10 years, depending on a handful of factors.

How long does it take a solar system to pay off?

The average solar payback period for EnergySage customers is currently just over seven years. However, without the federal tax credit, that same system would take over 10 years to pay for itself. Here's what you need to know about how long it's likely to take you to break even on your solar energy investment—and why timing matters.

How long is a solar panel payback period?

The solar panel payback period typically ranges from six to 10 years, varying based on system size, location and incentives. Federal and local rebates, including a 30% federal tax credit, significantly lower initial solar installation costs.

How long do solar panels last on EnergySage?

That's the average payback period on EnergySage. At the end of those 7.1 years, your solar panels will have saved you enough money on your electric bill to cover the upfront cost of your system. Year eight in the example is

when you technically start saving money, having finally broken even on your investment.

How do solar energy costs affect your return on investment?

Specific energy costs in your area also directly impact your return on investment (ROI) from your solar power system. The higher your monthly electricity bill, the more quickly you tend to recoup your investment because it shortens your payback period.
