How many watts of outdoor power supply does Lithuania have

Overview

In order to break down monopoly in the natural gas market of Lithuania, the first large scale LNG import terminal in the Baltic region, was built in port of Klaipėda in 2014. It will be supplying 540 million cubic meters of natural gas annually from 2015 until 2020. The terminal is able to meet all of Lithuania's demand, and 90% of Latvia's and Estonia's natural gas demand.

How many wind power plants are there in Lithuania?

A total of 671 MW of wind power plants have been installed in Lithuania. As regards renewable electricity, in 2021, electricity produced by solar power plants amounted to 190.8 million kilowatts (kWh) of electrical energy, or by 48.1 per cent more than in 2020.

What percentage of Lithuania's electricity is imported?

However, about 42% of Lithuania's electricity is imported, indicating potential for further domestic development of clean energy to improve energy security. Meanwhile, fossil sources contribute a relatively small fraction, almost 11%, with gas making up a little over 6% of that.

How much electricity is produced in Lithuania in 2021?

In 2021, 1.36 TWh of electricity was produced, which accounted for slightly less than a third of the total electricity produced in the country, or more than 9.6 per cent of electricity consumed in the country. A total of 671 MW of wind power plants have been installed in Lithuania.

Is Lithuania a good country for solar energy?

Lithuania has been significantly expanding its solar parks, growing from zero in early 2000s to 814 MW capacity in 2022. Lithuania is a net energy importer. In 2019 Lithuania used around 11.4 TWh of electricity after producing just 3.6 TWh. Systematic diversification of energy imports and resources is Lithuania's key energy strategy.

How much energy does Lithuania produce a year?

The energy intensity to GDP fell by 4%/year between 2000 and 2022, compared to 2%/year in the European Union. Apart from a marginal production of around 30 kt, Lithuania imports all its crude oil (9 Mt in 2023, mainly from Saudi Arabia (40%), followed by Norway (27%) and the United States (24%).

What is Lithuania's electricity mix?

For the years 1990 to 2019 the data source is IEA . For the years 2020 to 2024 the data source is Ember . For the months 2024-08 to 2025-07 the data source is ENTSOE . Lithuania's electricity mix includes 26% Wind, 11% Solar and 6% Gas. Low-carbon generation peaked in 2003.
