## Overview

---

A 6kW system will cost \$15,600 on average and produce between 400-900 kWh of power a month, which can cover most home electric bills. How much does a 6kW Solar System cost?

We will walk you through the cost, size, and practicality of a 6kW system before you decide to buy. How much does an average 6kW solar system cost?

Based on the average cost of solar in 2025, a 6 kW solar system in the U.S. will cost about \$18,000. With the 30% federal tax credit, the solar system price drops down to about \$12,000.

How much does a solar inverter cost?

You can expect to spend \$0.15 to 0.24 per watt on a solar inverter, excluding installation costs. Smaller inverters for DIY systems cost less than \$500, while large inverters can cost more than \$3,000. Use a solar panel inverter size calculator to determine the right size for your system. There are three main types of solar inverters for your home.

Where can I buy a 6 kW solar system?

SunWatts has a big selection of affordable 6 kW PV systems for sale. These 6 kW size grid-connected solar kits include solar panels, DC-to-AC inverter, rack mounting system, hardware, cabling, permit plans and instructions.

What is a 6 kW solar system?

These 6 kW size grid-connected solar kits include solar panels, DC-to-AC inverter, rack mounting system, hardware, cabling, permit plans and instructions. These are complete PV solar power systems that can work for a home or business, with just about everything you need to get the system up and running quickly.

How much does a string inverter cost?

String inverters cost \$800 to \$2,500 on average. Most homes only require a single inverter, but you could need up to three if you have a larger-than-average residential solar energy system. String inverters work by connecting several solar panels, which send their electricity to a central point where the inverter converts the power.

How much electricity does a 6 kW solar system produce?

A 6 kW solar panel system produces about 8,711 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. DIYing a 6 kW solar panel system usually isn't your best bet: You're much better off hiring a professional solar company for optimal results. How much does a 6 kW solar system cost?
