# How much does it cost to install a solar power generator

## Overview

---

Typically, when asking how much is a solar generator cost, you're considering a range between \$2,000 and \$10,000 for a complete setup that includes panels, batteries, an inverter, and installation. How much does a solar generator cost?

Good examples include the 6kWh Goal Zero Yeti 6000X, the 4.8kWh Renogy Lycan 5000, and the 5.1kWh BLUETTI EP500. Expect to pay \$5,000-\$8,000 depending on accessories, grid-tie equipment, and solar panel choices. Pre-configured solar generators that can store more than 6kWh of energy are expensive and relatively new.

How much does a 2kWh solar generator cost?

A basic home 2kWh solar generator will cost you between \$1,600 and \$2,000. You could probably power a couple of appliances, keep lights on and recharge devices with a 2kWh solar generator. Our favorite 2kWh solar generator is the BLUETTI AC200P - or upgrade to the AC200MAX, which can be extended by adding additional power packs.

How much does a home backup solar generator cost?

A home backup solar generator capable of powering most appliances, keeping your LED lights on, and keeping your electronics charged and running will cost between \$2,000 and \$10,000 depending on capacity, power rating, and included accessories. Let's look at how these choices will impact how much you'll spend.

How much does a solar panel cost?

The most common addition is solar panels. These come in handy during a power blackout when you cannot recharge the solar generator from the outlet. A 200W solar panel costs between \$150 and \$250. If you want a flexible or foldable solar panel, expect to pay about \$300.

How much does a solar power kit cost?

A complete solar power kit for whole home use with batteries, inverter, battery charge controller, safety breakers, grid-tie equipment, installation accessories, and solar panels will cost between \$8,000 and \$30,000 depending mostly on capacity and peak power rating.

How much does a solar power station cost?

There are bigger power stations that can power a significant chunk of your home. Good examples include the 6kWh Goal Zero Yeti 6000X, the 4.8kWh Renogy Lycan 5000, and the 5.1kWh BLUETTI EP500. Expect to pay \$5,000-\$8,000 depending on accessories, grid-tie equipment, and solar panel choices.
