How to convert 36V photovoltaic panel power generation to 12V

Overview

The correct solution is simply to buy a solar charge controller that's made for 12V batteries, but which supports 50V or more on the input. We're not allowed to do product recommendation here, but there are plenty of those out there if you look for them.

How to convert 36V photovoltaic panel power generation to 12V

12v Solar without a Battery

If you have a small 12v appliance that you wish to power/charge when the sun is out, you can use a 24v/36v to 12v step down converter. This will modulate the
