Huawei Communications 5G base station equipment

Overview

What is a Huawei base station?

Let's dive into a technical explanation. A base station, also known as an eNodeB (for 4G LTE) or gNodeB (for 5G NR) in Huawei's terminology, is a piece of equipment that facilitates wireless communication between user equipment (UE) like smartphones, tablets, and IoT devices, and the core network of the telecommunications provider.

Does Huawei offer a 5G network?

As the world transitions from 4G LTE to 5G, Huawei's equipment has become central to many mobile operators' strategies. The company offers a wide range of 5G solutions, including base stations, antennas, core network components, and software-defined networking tools.

How many 5G base stations does Huawei have?

The contracts have been split into two projects, with the first covering 63,800 base stations using 2.6GHz to 4.9GHz spectrum, while the second covers 23,141 in the 700MHz band. Huawei is estimated to have secured 45,426 5G base stations worth an estimated 4.1 billion yuan (US\$574 million).

How does Huawei 5G ran work?

One of the standout features of Huawei's 5G RAN equipment is its implementation of Massive MIMO (Multiple Input, Multiple Output). This technology uses a large number of antennas at the base station to improve spectral efficiency and increase network capacity.

What is a 5G base station?

5G base stations operate on various frequency bands, including sub-6 GHz and mmWave, to deliver ultra-low latency, high data throughput, and enhanced capacity. They support massive MIMO (Multiple Input Multiple Output) technology, enabling improved coverage and simultaneous

connections for a large number of devices.

What is a 5G NR Network?

As defined in 3GPP TS 38.300, the 5G NR network consists of NG RAN (Next Generation Radio Access Network) and 5GC (5G Core Network). As shown, NG-RAN is composed of gNBs (i.e., 5G Base stations) and ng-eNBs (i.e., LTE base stations). The figure above depicts the overall architecture of a 5G NR system and its components.
