Huawei base station outdoor cabinet

Overview

How much power does a Huawei base station use?

APM30+ RFC +TMC+BB,DRFU (S444)/ GRFU (S121212): 4-hour standby (184Ah) Description: The power consumption of the transmission cabinet is less than 200W. Huawei's fourth-generation base station includes: indoor macro base station BTS3900, outdoor macro base station BTS3900A, distributed base station DBS3900.

What is a Huawei S cabinet?

The S cabinet series launched by Huawei are enclosed small/medium-capacity cabinets designed with passive heat dissipation. The cabinets can dissipate heat through heat convection and conduction without a fan or heat exchanger.

How many RF modules are in a base station cabinet?

The base station cabinet contains as many as six RF modules. These multicarrier modules support both Huawei's GSM-R 5.0 and the company's enterprise LTE (eLTE). Use of this multi-radio base station (and similar indoor base stations) maximizes versatility while minimizing site deployment costs.

What is a Huawei M50 cabinet?

The M50 cabinet is a small outdoor cabinet launched by Huawei for the rapid construction of FTTH at old wireless sites. The cabinet adopts a fully enclosed design and is equipped with a high-efficiency heat exchanger, which can adapt to various harsh climate environments such as high temperature and offshore.
