

## SolarMax Energy Systems

# Huawei s share of wind power in China s communication base stations

Sample Order  
UL/KC/CB/UN38.3/UL

## Overview

---

How many 5G base stations did Huawei secure?

Huawei is estimated to have secured 45,426 5G base stations worth an estimated 4.1 billion yuan (US\$574 million). Huawei wasn't the only Chinese vendor to win a sizeable chunk of the tender, with ZTE the second-largest winner with around 26 percent of the contract, equivalent to 23,227 5G base stations.

What is Huawei's share in the global communications equipment market?

Additionally, according to the latest statistics from market research firm Omdia, Huawei's share in the global communications equipment market (including small and large base stations) reached 31.3 percent last year, ranking first.

Is Huawei a good telecommunications company?

Huawei, a Chinese company, has made impressive strides in the global telecommunications sector, serving as an excellent example of China's exceptional manufacturing capabilities. The company has demonstrated resilience, innovation and strategic market positioning despite challenges from the US and Western nations attempting to restrict its growth.

How much will Huawei spend on 5G?

The operator, which ended Q1 with 983 million mobile subscribers, expects to spend 83.1 billion yuan (\$11.6 billion) on 5G networks this year. Huawei previously won 57 percent of China Mobile's previous 5G tender process back in 2020.

How does Huawei's emergence impact emerging economies?

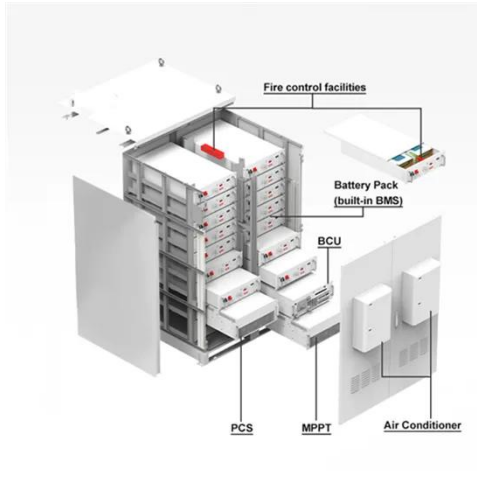

However, Huawei's emergence is also forcing more world-class manufacturers to be more proactive in the face of technological and market competition so that more emerging economies can benefit from fair competition. Huawei's

endeavor is not only a story about how Chinese companies are breaking through US containment and going global.

How many 5G sites are there in China?

On June 6, 2019, the Ministry of Industry and Information Technology issued 5G licenses, and since then Chinese carriers have been ramping up large-scale 5G deployment. By the end of the year, more than 130,000 5G sites are expected to be put into operation nationwide.
