# Hungarian Valley Power Storage Device Prices

## Overview

---

How much does Hungarian government spend on energy storage projects?

The Hungarian government has allocated HUF 62 billion (EUR 158 million) for energy storage projects with an overall 440 MW in operating power. Hungarian authorities launched the tender for grid-scale batteries on January 15 and received offers until February 5. The winning bidders were selected a few days ago.

Will Hungarian energy storage projects get subsidy support?

The Hungarian Ministry of Energy has announced that around 50 grid-scale energy storage projects with a cumulative capacity of 440 MW have received subsidy support through a tender launched in February this year.

Where will Hungary's largest energy storage system be built?

With funds obtained through a previous program, transmission system operator MAVIR is already building the country's largest energy storage system – a 20 MW project in Szolnok, central Hungary, the ministry said. It added that several projects with even bigger capacity will be installed under the tender concluded a few days ago.

What is Hungary's energy storage goal?

The ministry said that Hungary has set its 2030 energy storage goal at 1 GW in the updated National Energy and Climate Plan. [Home » News » Electricity » Hungary awards EUR 158 million for 440 MW of energy storage.](#)

Is MAVIR building a 20 MW energy storage system in Hungary?

With funds obtained within a previous program, the country's transmission system operator MAVIR is already building a 20 MW energy storage system in Szolnok in central Hungary, the ministry noted.

How much solar capacity does Hungary need?

Hungary has set a target of 12 GW of solar capacity by the start of the next decade. However, grid capacity shortfalls have been dire, hampering primarily the rollout of large-scale solar. The country's revised National Energy and Climate Plan envisages the construction of a total of 1 GW of storage capacity by 2030.
