

SolarMax Energy Systems

Hybrid solar inverter prices

Overview

What is a hybrid inverter?

Hybrid inverters are essentially two inverters in one; they combine a solar inverter and a battery inverter into one simple unit. These advanced inverters use solar energy to power your home, charge a battery or send excess energy into the electricity grid. Most hybrid inverters can also provide emergency backup power during a blackout.

Where can I buy a hybrid inverter?

Thanks to our cooperation with Europe's leading distributors in the solar and photovoltaic trade, we at Solartraders can guarantee permanently low prices. In our range you will find hybrid inverters from all leading manufacturers in the industry, such as Huawei, SMA or Fronius.

How to choose a solar hybrid power inverter?

When purchasing a hybrid power inverter, you have to make sure it suits the size of your solar panel system. For example, if your solar panel array has a combined power of 5kW then a 5,000 W inverter should be just right for it. Consult with the solar hybrid inverter manufacturer when in doubt and read the guidelines.

What are the different types of hybrid solar inverters?

There are four main types of hybrid solar inverters; This is the most common type of hybrid solar inverter that allows storing solar energy in a battery. However, it cannot be reliable during power cuts because it is not connected to a grid system. This is an advanced hybrid solar inverter with a built-in backup or a separate unit.

How efficient is a hybrid inverter?

The efficiency of an inverter is close to 100%, which means that almost no electricity loss occurs while it's working. A hybrid inverter functions as both an

inverter for electricity from solar modules and a battery. Some homeowners install a hybrid inverter even if they don't have batteries.

Is a hybrid solar system a smart investment?

A hybrid solar system is a smart investment because it significantly reduces long-term costs compared to diesel generators and normal inverters. While diesel generators require constant fuel and maintenance, and normal inverters rely on expensive grid electricity, hybrid solar uses free solar energy, leading to minimal running costs.

 **Efficient
Higher Revenue**

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150W Peak Output Power
- 2 MPPT Trackers, 100% DC Input Overvoltage
- Max. PV Input Current 15A, Compatible with High Power Modules

 **Intelligent
Simple O&M**

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locates PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

 **Flexible
Abundant Configuration**

- Plug & Play, EPS Switching Under 30ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
