

## SolarMax Energy Systems

# Import tax on energy storage power supplies

## Overview

---

How will the new US import tariffs affect battery energy storage?

The new US import tariffs, including a 10% baseline on all goods and higher rates for key trading partners, such as China, Malaysia, and Vietnam, is expected to have a significant impact on the US battery energy storage industry.

Will US tariffs affect energy storage?

There have also been indications that the US administration may consider other tariff proposals impacting energy storage, such as a 10–20% universal tariff, tariffs of up to 60% across the board on Chinese-origin goods, and tariffs of 25% on Mexican and Canadian origin goods.

Which stationary energy storage products are affected by battery tariffs?

Stationary Energy Storage Products Affected by Battery Tariffs Large-format stationary energy storage systems like Tesla's Powerwall and Megapack also face cost increases due to the latest tariffs. These products rely heavily on lithium battery cells sourced from Chinese suppliers.

How does tariff risk affect a battery energy storage system (BESS) project?

Mitigating tariff risk in battery energy storage system (BESS) projects is crucial for ensuring project financial viability, as tariff changes can significantly affect cost structures and overall project economics.

Are ev and battery energy storage industries vulnerable to Trump's tariffs?

Analysts see negative impacts across the board, but EV and battery energy storage industries seem particularly vulnerable to US President Donald Trump's sweeping tariffs. Image: Official White House Photo by Shealah Craighead From ESS News.

Which international trade issues will remain a concern for energy storage

projects?

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.

### Home Energy Storage (Stackble system)

-   
High Efficiency
-   
Easy installation
-   
Safe and Reliable
-   
Perfect Compatibility

**Product Introduction**

-  Scalable from 10 kWh to 50 kWh
-  Self-Consumption Optimization
-  Integrated with inverter to avoid the compatibility problem
-  LFP battery, safest and long cycle life
-  Stackable design for easy installation
-  Capable of High-Powered Emergency-Backup and Off-Grid Function
