

**SolarMax Energy Systems**

# **India Wind Solar and Multi-Energy Storage**

## Overview

---

Does India need a solar energy storage system?

India has ramped up its wind and solar energy. It now needs to expand places to store it. A worker walks in front of the 500-kilowatt battery energy storage system inside the Hindustan Coca-Cola Beverages factory in Thiruvallur district, on the outskirts of Chennai, India, Tuesday, July 16, 2024. (AP Photo/Mahesh Kumar A.).

Can solar-plus-storage transform India's energy landscape?

As a long-term renewable energy partner in India, we recognize the immense potential of solar-plus-storage in transforming the country's energy landscape. We are actively exploring co-located solar and storage as well as standalone BESS projects to support energy security, grid reliability, and sustainable economic growth.

Why is energy storage important in India?

Energy storage is playing a growing role in stabilizing India's grid and integrating renewable power. India has mandated two-hour co-located battery energy storage systems (BESS) in future solar projects.

What is India's energy storage policy?

India's policy landscape for energy storage is evolving rapidly. The government has introduced hybrid renewable and storage policies, along with increased budget allocations for solar projects, including \$1.1 billion for grid-connected solar and funds for rooftop solar.

How much solar power does India need?

Since 2010, India has installed ~25 GW of wind power and 35 GW of solar PV. The 80% renewables scenario studied here would require addition of approximately 1000 GW of wind power and 500 GW of solar PV by 2040. This growth would call for a fundamental shift in India's energy system.

## How big is India's wind capacity?

Wind capacity today is 46.42 GW, with a target of 140 GW by 2030 that includes 30 GW offshore projects. In 2023 alone, India added 2.8 GW onshore capacity, while the government has earmarked ₹7,453 crore in viability gap funding for offshore development. A big concern is storage.
