

SolarMax Energy Systems

India s new photovoltaic panel specifications

DISTRIBUTED PV GENERATION + ESS

Overview

The revised QCO, 2025 introduces detailed testing and efficiency requirements for solar PV technologies, including crystalline silicon and thin-film photovoltaic modules. It also specifies rigorous safety measures for inverters and storage batteries to meet global standards. What is MNRE approved solar panel manufacturers in India?

The MNRE Approved Solar Panel Manufacturers in India list is a crucial guideline set by the government to ensure that solar panels used in the country meet high standards of quality and reliability. Being on this list means that companies have passed rigorous tests and certifications set by the Ministry of New and Renewable Energy (MNRE).

What are the specifications for a PV module?

The specifications for the PV Module is detailed below: The PV modules must be PID compliant, salt, mist & ammonia resistant and should withstand weather conditions for the project life cycle. The back sheet of PV module shall be minimum of three layers with outer layer.

Why are solar panels so popular in India?

Solar panel performance has advanced rapidly thanks to several innovative technologies. Here's a breakdown of the most important ones you'll encounter in the Indian market: This technology adds a special layer to the back of each solar cell, reflecting unabsorbed sunlight back into the cell for a second chance at conversion. The result?

.

What are the certification requirements for solar PV modules?

The PV modules shall conform to the following standards: IS 14286: Crystalline silicon terrestrial photovoltaic determine the resistance of PV Modules to Ammonia (NH₃) The PV module should have IS14286 qualification certification for solar PV modules (Crystalline silicon terrestrial photovoltaic).

What is the MNRE & how does it affect India's solar sector?

By incorporating global best practices and stringent efficiency measures, the MNRE's revised framework positions India's solar sector for sustained growth and innovation. India updates solar PV regulations under the 2025 Quality Control Order, mandating stricter BIS standards in the renewable energy sector.

Does Adani solar offer bifacial & monofacial PV modules?

Adani Solar offers and produces Bifacial & Monofacial PV modules in TOPCon & MonoPERC technologies of M10 and G12 footprints with a Power class of 535-660W, module efficiency of 21-22%, and a target Bifaciality of 75-85%.
