

SolarMax Energy Systems

Indonesia factory energy storage project

Parallel (Parallel operation up to 6 unit (only with battery connected))

AC input wires

AC output wires

Overview

Chinese battery manufacturer Rept Battero has announced plans to develop an 8GWh gigafactory in Indonesia specialising in lithium-ion cells for battery energy storage systems (BESS). Will China build a 3gwh Energy Storage Base in Indonesia?

By Dominikus China's leading energy solution provider Shenzhen Clou Electronics Co., Ltd. plans to build a 3GWh energy storage manufacturing base in Indonesia, according to the company's 2024 Annual Report released in March 2025.

How many GWh will Indonesia's battery factory produce?

The first phase of the Indonesian battery factory is expected to achieve an annual production capacity of 8 GWh of lithium-ion batteries and components. Hong Kong-listed REPT Battero has announced plans to invest in a new battery production facility in Indonesia.

Can Singapore make solar panels and battery energy storage systems in Indonesia?

Singapore-based developer Vena Energy says it will investigate opportunities to make solar panel components and battery energy storage systems in Indonesia, in order to support a hybrid megaproject with up to 2 GW of solar and more than 8 GWh of energy storage. From pv magazine Australia.

Could energy storage be the future of Indonesia's energy transition?

With variable renewable energy generation, such as solar PV and wind, set to take centre stage in the country's energy transition, energy storage will complement this. This potential has seen several prospective manufacturing facilities proposed in Indonesia.

Is battery storage taking off in Indonesia?

Despite the opportunities for manufacturing, from a deployment perspective,

battery storage has not yet taken off in Indonesia beyond a handful of projects, including a 5MW pilot announced by the government in March 2022. Rept Battero has announced plans to develop an 8GWh gigafactory in Indonesia specialising in lithium-ion cells for BESS.

Why do Indonesian batteries need a battery energy storage system?

Batteries are required to provide constant electricity supply to renewable energy plants, which are primarily intermittent, such as solar and wind power plants. The agreement was made with other state-owned bodies, such as the Indonesian Battery Corporation, to build the Battery Energy Storage System by 2022.

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled
