

## SolarMax Energy Systems

# Inverter Planning for Mobile Energy Storage Sites in Australia

## Overview

---

Can smart inverter technology support the power grid in Australia?

Image: Fluence. A 50MW/50MWh grid-scale battery energy storage system (BESS) will be used to demonstrate the ability of smart inverter technologies to support the stability of the power grid in Australia. Broken Hill in New South Wales is a site with a strong history in the mining industry.

Where are SMA battery inverters located?

South Australia, 2023 Sited on Torrens Island, South Australia, SMA battery inverters connect Australia's second largest (Aug, 2023) battery energy storage system (BESS), with a 250 MW / 250 MWh power capacity to the National Electricity Market grid, one of the world's longest interconnected power systems.

How can renewable storage technology transform Australia?

Renewable storage technologies have the potential to revolutionise clean and reliable energy access in remote communities, support cost-effective decarbonisation in industry and transform Australia into a green hydrogen export superpower.

What are Australia's New inverter installation rules?

The upcoming inverter installation rules represent a major shift in the regulatory landscape for distributed energy systems in Australia. With a focus on safety, flexibility, and grid stability, the new guidelines encourage responsible growth of solar and battery technology.

Who makes grid-forming inverters?

The grid-forming inverters themselves will be supplied by EPC Power, a California-headquartered manufacturer which was recently picked as power electronics supplier to EVLO Energy Storage, the energy storage system integrator subsidiary of Canadian utility HydroQuebec.

Which private developers are deploying a new battery energy storage capacity?

Alongside Neoen, other private developers have deployed a further 1.1 GW of battery energy storage capacity. This is led by Eku Energy (through its two joint ventures with Shell and Engie), Edify Energy, and Vena Energy. Private developers account for three-quarters of BESS capacity operational today.
