What Is a Frequency Converter?

A frequency converter is a device designed to convert an input frequency to an arbitrary output frequency.

What is a frequency converter?

A frequency converter is a device designed to convert an input frequency to an arbitrary output frequency. Frequency, also referred to as the frequency of oscillation, represents the number of times an electric current or radio wave completes a full cycle per second. Electric currents can be either direct

current (DC) or alternating current (AC).

Who makes ExelTech inverters?

Exeltech, founded in 1990 and based in Fort Worth, Texas, is a manufacturer and designer of pure sine wave inverters. The company's products include XP series inverters, ICX chargers, MX series inverters, frequency converters, and XP series inverters.
