

SolarMax Energy Systems

Inverter with colloidal battery

Overview

What is a hybrid inverter?

Hybrid inverters are essentially two inverters in one; they combine a solar inverter and a battery inverter into one simple unit. These advanced inverters use solar energy to power your home, charge a battery or send excess energy into the electricity grid. Most hybrid inverters can also provide emergency backup power during a blackout.

Can a hybrid inverter be used as a storage system?

As a hybrid inverter, you can upgrade your solar system to a storage system at any time with Sigen Battery, enjoying seamless energy backup. Integrate with smart loads to unlock more energy application. Get involved in VPP, utilize the Sigen AI mode with dynamic tariffs, and access more additional features.

Can a hybrid inverter work with a HV battery?

Additionally, most high-voltage hybrid inverters can only work with one type of HV battery, which is often the same brand as the inverter. However, HV batteries generally offer more continuous and peak power per kWh, which is useful if a high backup load power is needed.

How to choose an inverter that has a battery?

Choosing a good inverter that has a battery for your home is a crucial process. To ensure that your battery of the inverter performs optimally and reliably, you need to consider multiple factors. • Power Needs: Calculate the total wattage of the appliance that you want to be operated on blackout.

How do I choose a hybrid inverter?

When evaluating a hybrid inverter, it's important to inquire about these capabilities and how they can be customized to suit your needs and preferences. Jason Svarc is an accredited solar and battery specialist who has

been designing and installing solar and battery systems for over a decade.

Do hybrid inverters provide emergency backup power during a blackout?

Most hybrid inverters can also provide emergency backup power during a blackout. Hybrid inverters for residential use are available in capacities ranging from 3kW to 15kW, offered in both single-phase and three-phase varieties, with various intelligent control features.

Inverter with colloidal battery

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled
