

## SolarMax Energy Systems

# Iran container BESS power generation

## Overview

---

What is a battery energy storage system (BESS) container?

BESS (Battery Energy Storage System) containers are solutions that integrate battery storage systems into standardized, transportable, and installable containers. Their roles include: BESS containers integrate batteries, inverters, control systems, and other equipment into a modular framework, making them easier to manage and maintain.

What is a Bess container?

BESS containers integrate batteries, inverters, control systems, and other equipment into a modular framework, making them easier to manage and maintain. These containers typically include temperature control, monitoring, and protection systems to ensure the system operates smoothly and monitor the status of each component in real-time.

Why do you need multiple Bess containers?

Multiple BESS containers can be used in tandem to provide greater storage capacity and system flexibility. This scalability makes them suitable for large-scale energy storage and management needs, allowing for flexible adjustments based on actual requirements. This is one of the most popular BESS containers on the market.

What are the benefits of a Bess energy storage system?

- **Flywheels:** Store energy in the form of kinetic energy, suitable for short-term storage and high-power applications. BESS offer a range of benefits, from energy independence to cost-effectiveness, that make them integral to modern energy management strategies.

How much does a Bess container cost?

The cost of a BESS container depends on its size, storage capacity, and additional features. On average, a 40ft container with a 3MWh capacity can

range from \$500,000 to \$1,000,000 or more, but prices vary based on specific requirements and configurations.

What is the size of a Bess battery container?

The size of BESS containers varies based on application needs, the type of battery selected, and energy storage capacity, but they generally adhere to standardized container dimensions. Common BESS container sizes include: Approximately 6 meters long, 2.4 meters wide, and 2.6 meters high.

- Efficient Higher Revenue**
  - Max. Efficiency 97.5%
  - Max. PV Input Voltage 600V
  - 1500W Peak Output Power
  - 2 MPPT Trackers, 150% DC Input Overvoltage
  - Max. PV Input Current 15A, Compatible with High Power Modules
- Intelligent Simple O&M**
  - IP66 Protection Degree: support outdoor installation
  - Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
  - DC & AC Type II SPD: prevent lightning damage
  - Battery Reverse Connection Protection
- Flexible Abundant Configuration**
  - Plug & Play, EPS Switching Under 10ms
  - Compatible with Lead-acid and Lithium Batteries
  - Max. 6 Units Inverters Parallel
  - AFCD Function (Optional): when an arc fault is detected the inverter immediately stops operation
